JOIN OUR TEAM

BECOME AN AIR METHODS AVIATION MAINTENANCE TECHNICIAN
To the highest standard are two of the many rewarding benefits of being
maintaining both an aircraft to airworthy condition and hangar facilities
to maximize aircraft availability. The pride of ownership and autonomy for
maintenance, including planning maintenance efficiently and effectively
make an Air Methods technician successful. Field technicians are tasked

**Detail-oriented. Self-starter. Team player.** These are the qualities that

part of the team that ensures the aircraft is mission-ready.

Air Methods aviation maintenance technicians (AMTs) are an essential
than the safety of those on board. Together with the pilot and medical crew,

When it comes to air medical transport, there is nothing more important
with the majority replacing older model aircraft.

Because the safety of patients and crew are always a
top priority, the company has invested more than $100
million in advancing and incorporating safety programs
and technologies into its operations.

## AMT WORK LIFE: SUPPORT & OPPORTUNITY

### WORK SCHEDULE

Air Methods is committed to providing air medical transport resources to
our communities 24 hours a day, 365 days a year. Therefore, our field
technicians typically work non-traditional hours. Technicians work at
the location where the aircraft is based, perform the maintenance (including
preventative maintenance), complete necessary paperwork, and then
go home. This philosophy encourages adequate rest to ensure optimum
performance when on duty. Field technicians are guaranteed pay for 40
hours a week, and Air Methods strives to schedule every other weekend off
for field technicians.

### AVAILABILITY

Technicians at a base, where there is normally only one assigned mechanic,
are expected to be available by cell phone at all times. At bases where
there are two or more assigned technicians, at least one technician must
be available by pager at all times. At bases with multiple technicians, it
is expected that off-duty technicians are reasonably available to the on-
duty technicians in the event of an unscheduled maintenance event and
available to work during periods of heavy scheduled maintenance.

### UPWARD MOBILITY

Because of the scope of Air Methods operations, technicians are afforded
many opportunities for upward career mobility. If qualified, technicians can
move from a field technician position to a lead technician, to a regional
maintenance manager, and even to the regional maintenance director
position. Additionally, if a field mechanic is willing to relocate, he/she can
choose from over 300 bases across the nation to work.

### UNIFORM & TOOLS

Professional appearance, necessary tools and connectivity are a must.
Uniforms are supplied to all field-based technicians. Air Methods has a tool
reimbursement policy and will also provide computers and cell phones to
all field technicians.

---

## THE TRAINING ROOM

Initial technician training is conducted over a five-day period at
the national training center in Colorado and includes review and/or
instruction on the following:

- Air Methods’ operational expectations, FAR Part 135 Manual,
maintenance memos and notices, and FARS as they apply to
Air Methods
- Completion and distribution of Air Methods’ documentation
- Maintenance record-keeping processes such as airframe and
engine logbooks, weight and balance, equipment lists, and
component historical records
- Proper ordering, receiving, storing, packing and shipping of
parts
- Use of Aircraft Status Sheets and FAA Form 337s
- Hazmat Policies and Procedures
- Anti-Drug/Alcohol Program
- Centralized computer software training

---

## RECURRENT AMT TRAINING

During the year, Air Methods also schedules training on specialized
subjects such as autopilot maintenance and field level engine
maintenance at centralized field locations. These are usually two-
to four-day classes.
