

# PERSONALIZED CARE PROGRAM

As patient advocates, our purpose is to offer the best experience and resolution, while keeping the patient engaged as partners.

-  **PERSONALIZED COMPASSION** We understand the strain an unforeseen situation has. We strive to assist each patient in maneuvering through the process with ease and compassion.
-  **PERSONALIZED ADVOCACY** Our focus is on the recovery and well-being of the patient's health. All of us are committed wholeheartedly to making this process as stress-free as possible.
-  **PERSONALIZED REDUCTION** Our reduction programs are designed around each patient and his/her individual needs and ability to repay.
-  **PERSONALIZED EMPATHY** Empathy is crucial when establishing relationships with our patients; it is the ability to understand firsthand what the patient is feeling and experiencing his/her concerns.

*\*We can apply CARE to any patient's out-of-pocket cost.*
